SIDH CAB

Collection 2026.

WELCOME

To Sidhcab Family

“**Siddharth Cables**” has an Experience of Manufacturing Customised Wires & cables For More Than 3 Decades with the help of Advanced technology and Skilled Employees Arena. Now we’ve been at the forefront of producing high quality cables for housing, commercial and industrial use.

Our brand **SIDH CAB** enjoys the reputation of being the market leader. We manufacture a wide range of quality cables at our modern and well equipped plant assuring our customers 'The Complete Protection'.

At our company, we are passionate about safety, quality and promises.

Our dedicated team of skilled operators and engineers work hand-in-hand to test and manufacture cables that offer unmatched performance and aesthetic appeal. We take pride in our work, ensuring every production undergoes rigorous testing and inspection before it reaches your hands, guaranteeing a product that is as reliable as it is. Whether you’re updating your home or outfitting a commercial space, **SIDH CAB** provides the perfect blend of function, elegance, quality and safety.

We are committed to enhancing your experience by offering cables safe for your space.

What began as a vision of a Multistrand wire has now evolved to include Submersible cables, Copper Round cables and other wiring as well. All the cable products we make are now available further in this catalogue.

SIDH CAB

SIDH CAB

WHY Sidh Cab?

Unmatched Craftsmanship

Every Sidh Cab wire is produced with precision engineering and stringent quality control to deliver cables that combine reliability, performance, and robust durability.

Fire Retardant

Fire-resistant cables maintain power and signal integrity during a fire, enabling critical systems like alarms, lighting, and communication to function, which provides time for evacuation and safe rescue.

Premium Material Selection

We use only the highest-grade copper and insulation materials, guaranteeing superior conductivity, minimal energy loss, and extended cable life.

Energy Efficient & Eco-Friendly

Sidh Cab wires are designed for low power loss and are manufactured using environment-friendly processes, supporting both efficiency and sustainability.

Wide Range for Every Need

From residential to industrial requirements, Sidh Cab offers a full portfolio of wires and cables, ensuring the right solution for every application.

SIDH CAB

High Insulation Resistance

In all cables, there is generally leakage of current from the live conductor through the insulation. In case of inferior quality of insulation, the current leakage increases. This is unsafe and can cause damage to installations as well as become a threat to life.

RoHS Compliant

Release of certain harmful substances such as lead, mercury, cadmium and chromium in plastics/equipment are dangerous to the environment and health.

BEST COPPER USED

Sidh Cab wires use ETP grade annealed copper which is more than 99.97% pure and therefore ensures 101% conductivity (IACS).

Anti-Termite and Anti-Rodent

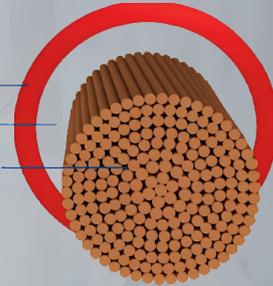

Termites and rodents cause extensive damage to paper, wood, plastic, etc. In case of electrical installations, damage caused by these pests may lead to short circuit which can result in major disaster, loss of property and human life. Sidh Cab cables with S3 technology provide insulation with termite and rodent repulsion properties.

Anti-termite/Anti-rodent feature is applicable for a period of 6 months from the date of invoice.

The background features a light gray gradient with faint, stylized circuit board traces and gear patterns. In the top-left corner, there are several red and gray dots connected by thin lines, resembling a network or data flow. In the bottom-right corner, there is a prominent logo consisting of a red 'S' and a black 'C' intertwined, with white circuit lines extending from the base.
